

Open letter to Latvijas Banka and Global Bank Elites

**Existential return to the Divine Culture of Laws of Nature**

20-09-2010

After thousands of years of ecological balance in our Baltic Sea Region and the world, just after sixty years of radioactive industry era, WE are now part of a giant out of hand experiment on massive radioactive and chemical toxicity exposure<sup>i</sup>, where insanity, wishful thinking, denial, and outright lies run the show. Baltic Sea is the most radioactive water basin in the world<sup>ii</sup> - You won't here this truth from the media empire. WE have come to the conclusion that OUR leaders are completely out of touch with reality and rather than guidance, protection and healing, they offer US disinformation and manipulation. How on earth did WE allow this to happen? **And what do WE expect in a world where psychopathic corporate interests dominate almost every area of life on Earth?** An invasive cancer has spread throughout our global society. Mother nature too has succumbed to the effects of this destructive ideology and now carries the seeds of ecological disaster in her womb<sup>iii</sup>. The machinations and heartless plans, the hubris and narrow-minded self-interest of the psychosis culture that rules OUR world have set humanity on a course for extinction. **Time is short! Who benefits when in a couple of decades there will be no people left to rule and control?**

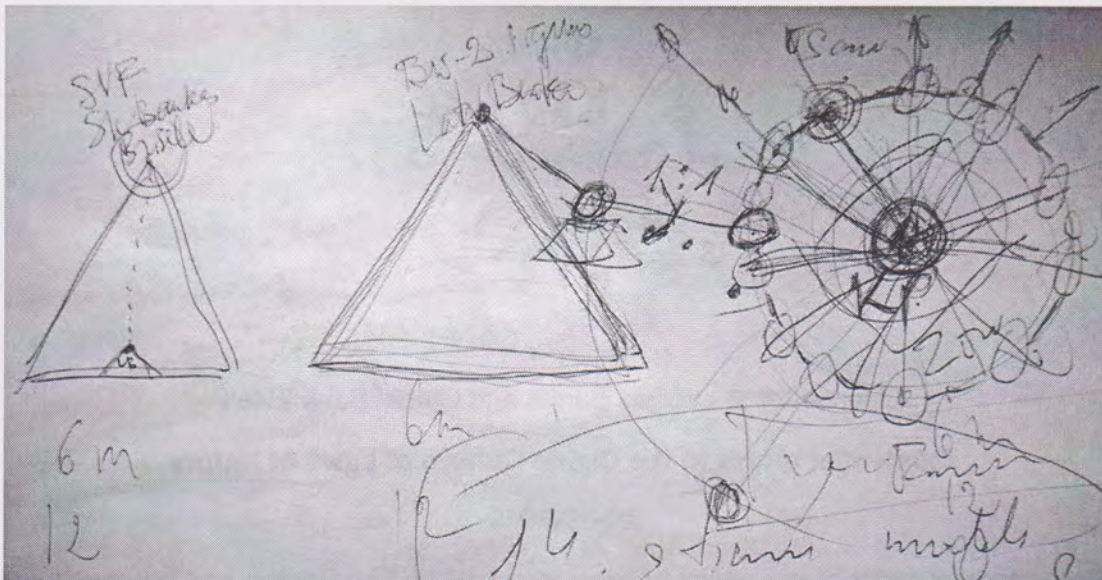

**WE, the professionals, are consolidating our powers in the networks of LatvijasRepublika.INFO (NationalRepublic.INFO on line soon). Necessity is urgent to return to the Divine Laws of Nature, to the comeback of the cultures that are still in direct connection with the Nature force.** Right now these cultures are being exterminated by the structures of the psychotic Corporate Global Systems. The sum of the errors created by the mind of the Corporate Global System is an evidence of absence of the Heart influence in it.

The very remains of the Balt ancient cultures are still breathing here, at the shore of the Baltic Sea, though assimilating more and more in the Diaspora. WE as well as YOU, Love, are in a desperate need of a period of Vital and Loving Rehabilitation. The geographic areas of OUR nations – **Latvia and Lithuania together combined – form the shape of a Loving Heart. WE are the Heart of the World!** Time is running out, when it is still possible to save the Natural Cultures that have protected the Earth for thousands of years. The question is: "To Be or Not to Be, Humanity?!"

**If YOU let the peoples of Nature Cultures thrive and flourish, YOU will SURVIVE and will be Loved as YOU have never been loved before, for YOU will be saving Humanity and Yourself, as well as YOUR close ones!**

**Our suggestion may be seen in the shadowy sketch below where the two-step model of the transition from the current Pyramidal to the Sun System society is visualized.**

**WE will stay in touch to discuss the approach in great detail and to establish structural improvements of the Global Systems shortly.**

**With Love,**

Ditta Rietuma

<sup>i</sup> Our brother nation's Israel's population is facing a dire threat: a drastic depopulation, from the use of weapons that leave behind Depleted Uranium (DU). Depleted Uranium leads to the word *Omnicidal*, as **DU kills everything in the food chain**, everywhere where the wind blows and the rain falls. Experts say **the dramatic drop in Israel's sperm count could eliminate their ability to reproduce.**" [http://www.bsrrw.org/?page\\_id=778](http://www.bsrrw.org/?page_id=778)

<sup>ii</sup> HELSINKI COMMISSIONS Conclusion: "The levels of anthropogenic radionuclides are higher in the Baltic Sea than in other water bodies around the world. Compared to the North East Atlantic and the North Sea, the concentrations of caesium-137 in the Baltic Sea are 40 and 10 times higher, respectively." "TOWARDS A BALTIC SEA UNAFFECTED BY HAZARDOUS SUBSTANCES - HELSINKI COMMISSION Overview 2007" Baltic Marine Environment Protection Commission – to the Ministerial Meeting in Poland, 15 November 2007, page 17. [http://www.helcom.fi/stc/files/Krakow2007/HazardousSubstances\\_MM2007.pdf](http://www.helcom.fi/stc/files/Krakow2007/HazardousSubstances_MM2007.pdf)

Check the combined PDF scanned pages from HELCOM and STUK scientific documents. Put notice that the last paper shows that the water itself is radioactive in the Baltic Sea, as the level of salt is low. <http://www.bsrrw.org/wp-content/uploads/2010/06/BS-radioactive-.pdf>
